PLAYLISTS

The most important part of the success of a track

We monitor **more than 6 million playlists** so that you know quickly in which playlists you have been added (or sadly, removed).

Pro tip: unlike other tools, you have access to data from tracks that are not yours. An easy way to help you target the right playlists.

SEARCH FUNCTIONS

We provide you with easy access to chart and playlist data for any artist or track in the world.

The search function was created to easily find what you are looking for.

If that is either an artist, track, album or label. We got you covered. You can search easily with a Spotify or Apple Music URL, ID, link or name.

ARTIST VIEW

If you search on artist you will get a selection of all the released songs.

To make it easier for you to select the track you are looking for, we included the cover photo, track title, ISRC code and Release date for each song.

ALL DATA IN ONE PLACE

Our goal is to make it easy for you to look at the data.

As soon as you know which track you are interested in, everything is just one click away: current chart positions, peak chart positions, current playlists, previous playlists, all the releases in each platform, … No more waste of time.

DATA EXPORTS

Need to export data? No problem.

It is also very easy create immediate PDF Reports or download all necessary data in CSV format with one click, so you can process the information in the way you would like for your meetings!

CHARTS
